

Customer-centric product development as the key to a new age of mobility

Marcel Amstutz

Project
services

Consulting and
business modelling

We are a shared mobility SaaS power house

Software
development

Operations
support

Customer centricity becomes the guiding principle in the design of products, which are built to exceed users' needs rather than satisfy complex technical aspirations

BCG, April 2017

When designing
services

We do things
because we can

Unfortunately, we all follow this rule too rarely

Change to real
Customer centricity!

Not because
customers want it

Mission
Vision
Values

Strategic
Goals

A brilliant idea, but not a business (yet)

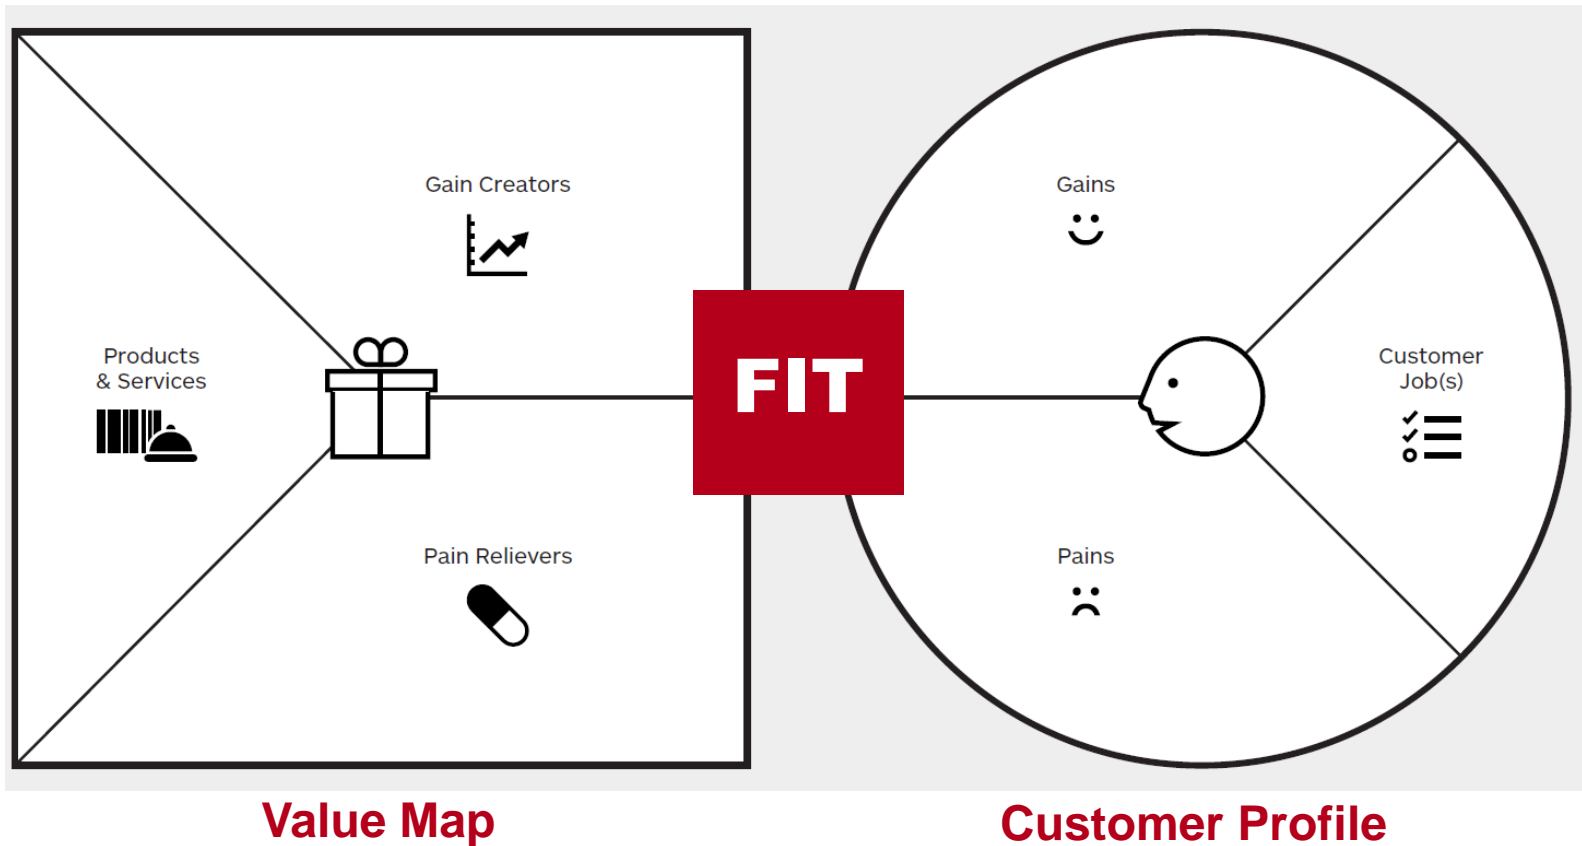

Strategy
Formulation

Strategic
Analysis

**Defining the strategy isn't the full journey
Essential is its successful implementation**

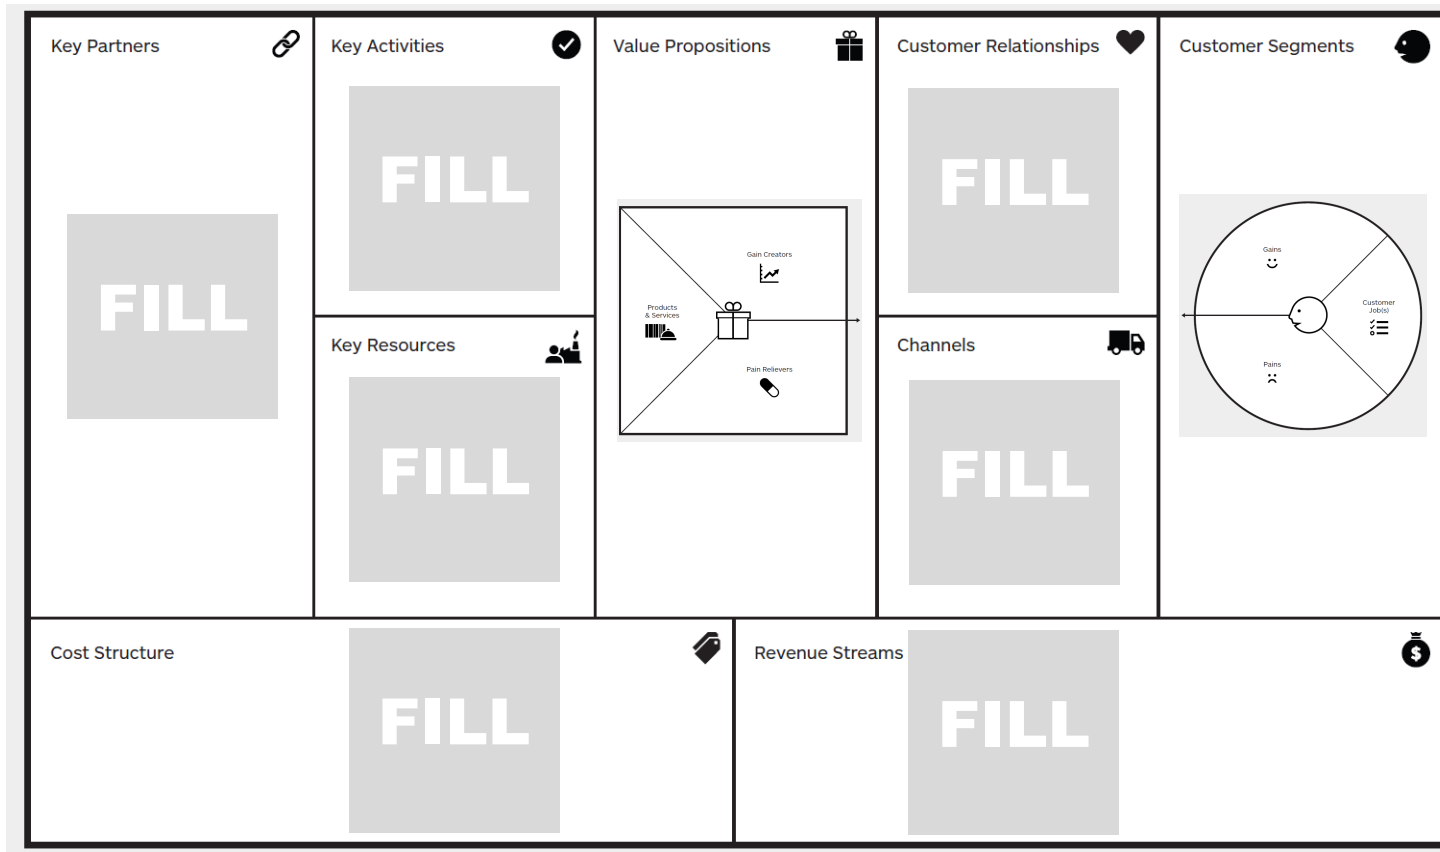

Value Proposition Canvas

Creating the value your customers want

Business Model Canvas

Paint a picture of your future business

Design Thinking

Taking you from insight to innovation

Empathize

Define

Ideate

Prototype

Don't get lost in translation

Transferring knowledge into software development

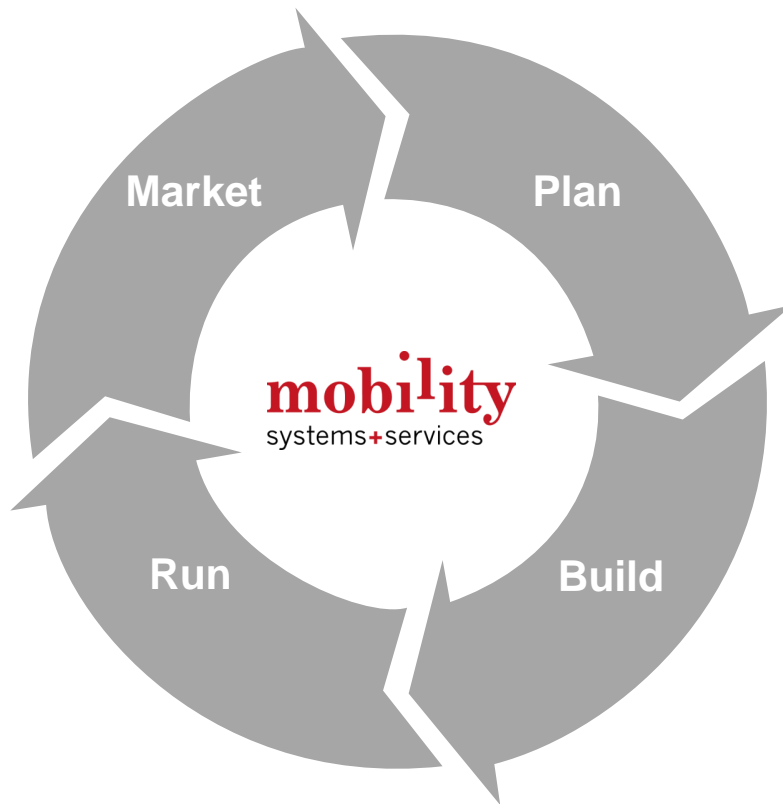

All you know
Product Backlog

What you work on
a 2-4 week Sprint
Backlog

Testing
and approving or
changing

Make available,
Ship increment to
customer

Hit the right note! Orchestrating a network of specialists

- + **Focus on core services**
- + **Partners for every phase**
- + **Blended models**
- + **Manage the interfaces**
- + **Observe, learn, adapt**

**Always checking ourselves:
Do we act product-centric?**

Always checking ourselves: Or customer-centric?
