ABOUT MOBYPARK

mobypark

In today's crowded cities, finding parking is a problem. The search for parking leads to a variety of other problems, such as CO_2 levels in the air, traffic jams and quality of life in cities....Mobypark has the solution!

mobypark

14 M: In the Netherlands, there are 14 million parking spaces
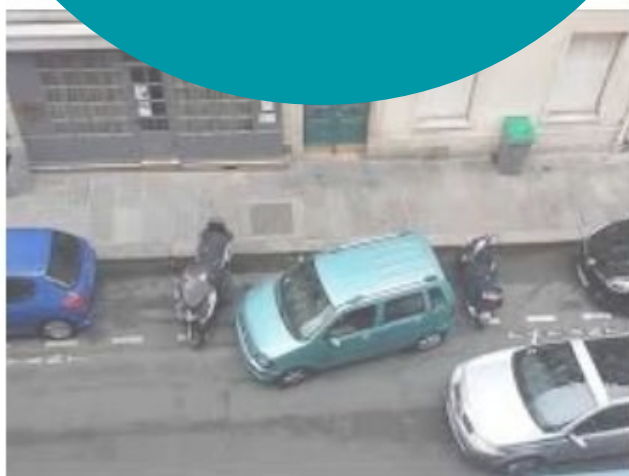

GX·27842

mobypark

1.5 X
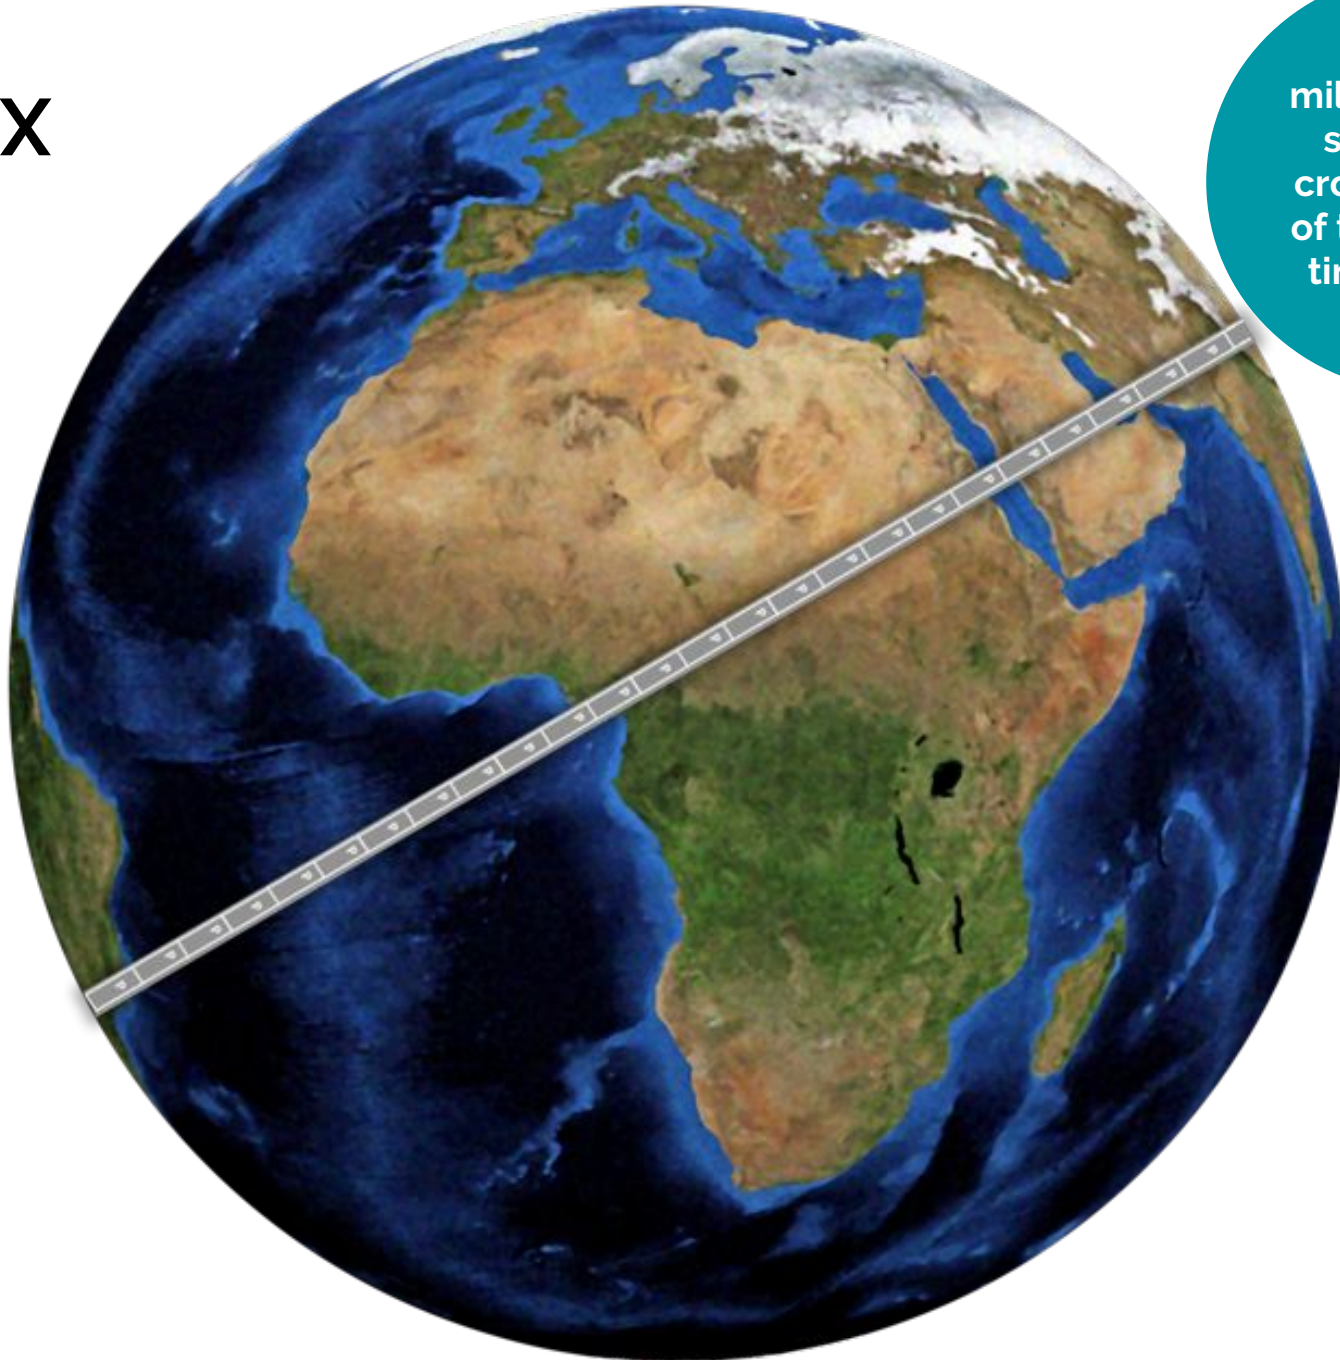

These 14 million parking spaces can cross the span of the Earth 1.5 times if lined up

mobypark

**30%** of the traffic jams in the big cities are caused by people looking for parking

mobypark

We also lose an average of **20 minutes** looking for parking
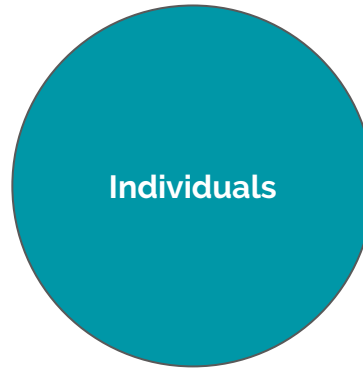

mobypark

1 year : we almost lose 1 year of our lives looking for parking!

mobypark

50% of the parking capacity is on the streets (street parking) The other 50% are owned by:
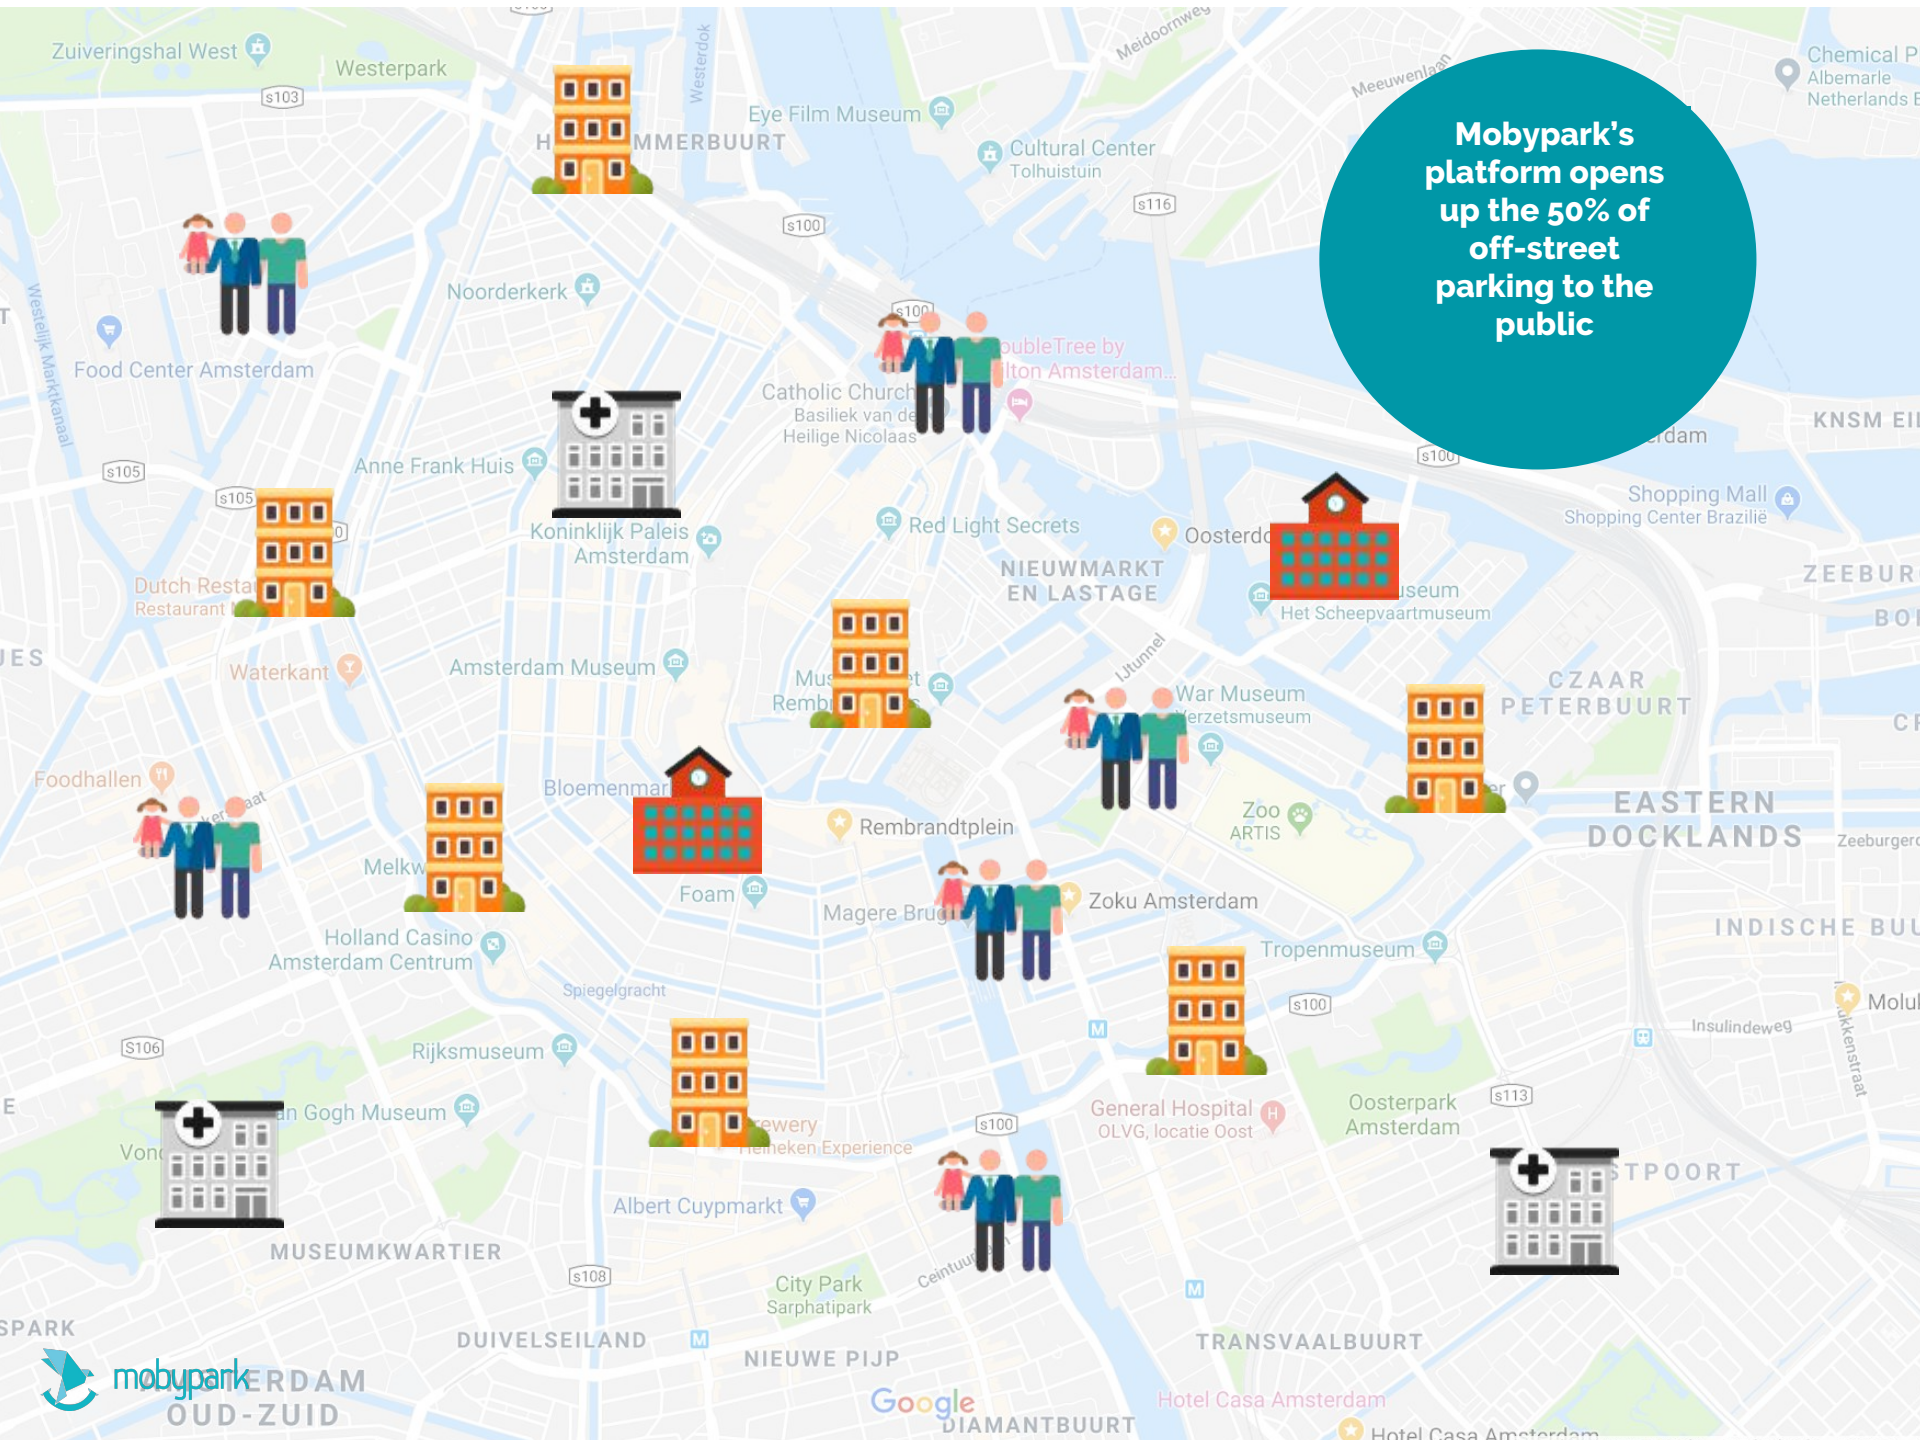

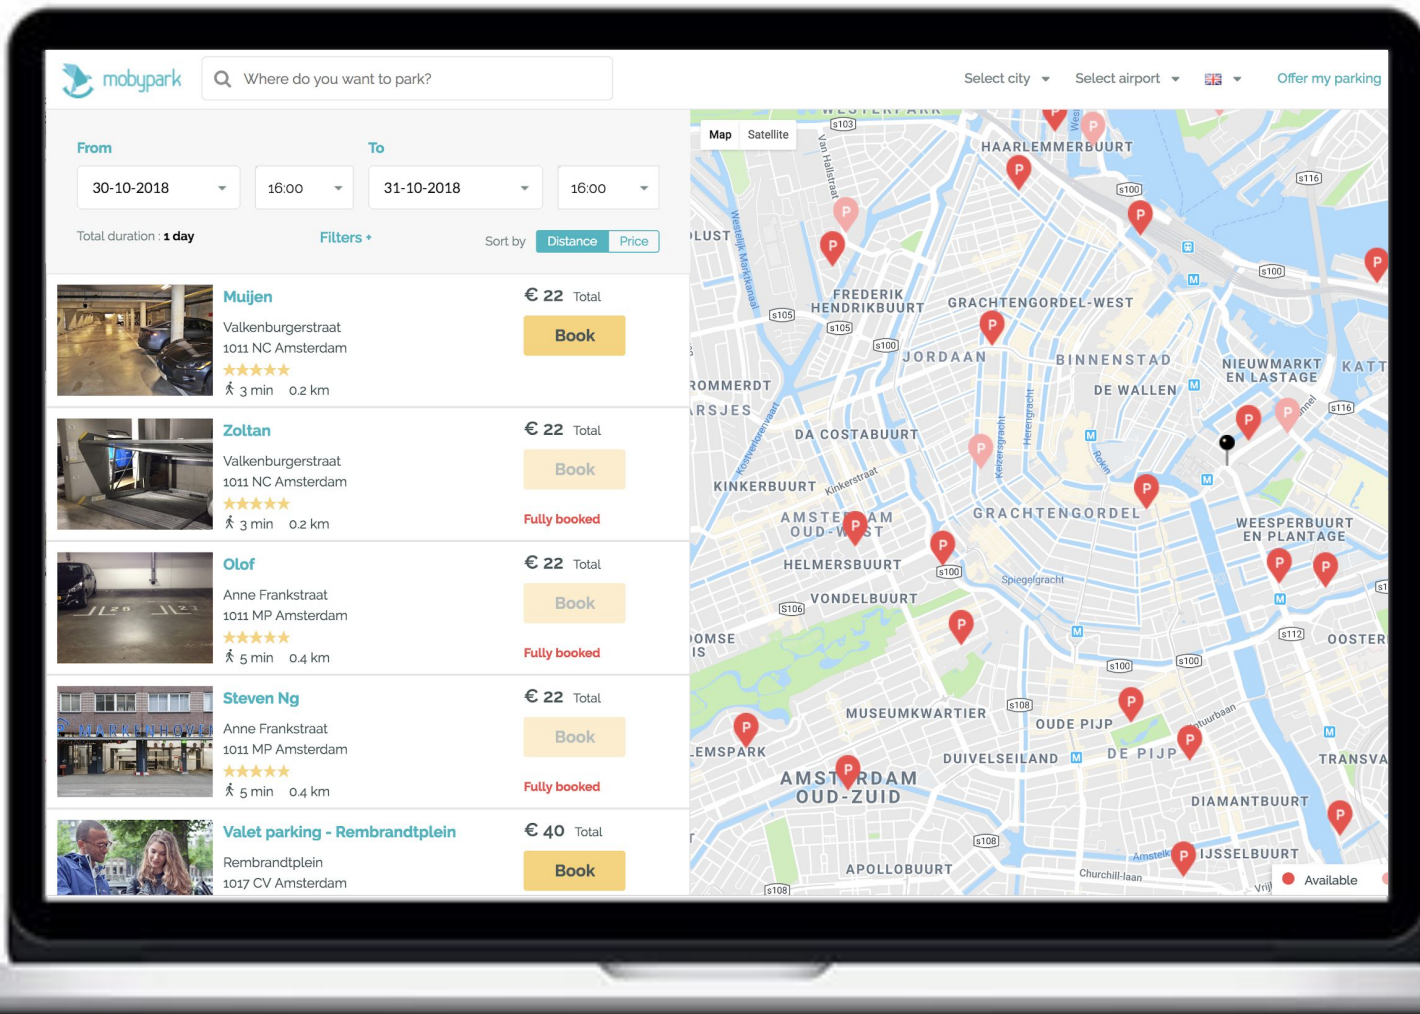

Hotels

Individuals

Municipalities

mobypark

Mobypark's platform opens up the 50% of off-street parking to the public

Private parking owners can upload their parking space online and set their parking availability, price and features.

mobypark

The WEF has released its index about quality of life of cities in G20 countries. The index number is set to 100 today.

In 2028, what will be the value of this index?

What are we doing towards improving this every day in our daily job?
